John Wolverton, Monmouth.  H. W. Murphy, Cleveland, W. T.
Wm. Churchill, Mohawk.  J. I. Thompson, Salem.
E. A. Shirley, Moscow, I. T.  E. Kidwell, Monmouth.
I. Vandayn, Independence.  F. S. Powell, "
W. C. Warriner, Salem.  D. S. Stump, "
L. Bentley, Monmouth.  W. D. Fenton, Lafayette.
A. W. Lucas, "  T. F. Campbell, Monmouth.

Officers of the Board.

I. F. M. Butler, President.  A. W. Lucas, Secretary.
Wm. Dawson, Vice President.  J. Wolverton, Treasurer.

Executive Committee.

F. S. Powell,  J. Wolverton.
A. W. Lucas.

FACULTY.

D. T. STANLEY, A. M. PRESIDENT,
Professor Mental and Moral Sciences, English and Biblical Literature.

W. E. YATES, A. M.,
Professor Greek, Latin and German Languages.

J. M. POWELL, A. M.,
Professor Mathematics and Physical Sciences.

Principal Preparatory Department.

Principal Primary Department.

Miss RETTA RASH,
Teacher of Instrumental Music.

Miss CASSIE STUMP, B. S.,
Teacher of French.

Such Assistants as are needed will be engaged as the session advances.
CALENDAR.

The Scholastic Year is divided into four terms of ten weeks each.

Begins
Sept. 22, 1882, First Term Nov. 14, 1882.
Nov. 22, 1882, Second Term Feb. 1, 1883.
Feb. 1, 1883, Third Term Apr. 13, 1883.
Apr. 13, 1883, Fourth Term June 21, 1883.

A vacation of one week is given for the Christmas holidays.

Students can enter at any time, but the first day of a term is the best time to enter.

EXPENSES.

TUITION PER TERM OF TEN WEEKS.

LOCATION.

The Willamette Valley is "the Eden of the West." Extending from the Calapooia Mountains on the South to the Columbia river on the North, a distance of 150 miles, with an average breadth of about 40 miles, bounded by the Cascade range on the east and the Coast range on the west. The surpassing beauty of the scenery, and the extreme healthfulness of climate, and great equability of temperature, are coming to be properly recognized, and it is becoming more and more what nature fitted it for—the land of beautiful, happy and prosperous homes.

Through the middle of the valley, flows from South to North, the lovely Willamette river, navigable for a distance of over 100 miles. The chief commercial towns of the valley are located on its banks, and it is an important artery of commerce.

About the center of this valley, two miles west of the river, on one of the most beautiful of rolling prairies that can anywhere be found, is

Monmouth, The Seat of Christian College.

It is a village of about 400 inhabitants, noted for their morality and devotion to the cause of education. The Oregonian Railway passes through the middle of the town, giving daily connection with Portland, and affording the means for easy travel and rapid freights, which have heretofore been wanting for the permanent prosperity of both town and College. In addition to a passenger depot in the middle of town, the O. & C. R. R. passes through Independence, two miles away, and the steamers plying the Willamette land there also; making Monmouth one of the most easy towns of access in the State.

The town is incorporated and its charter prohibits saloons and other kinds of immoral business within the corporate limits, and this provision has been reinforced by strict ordinances by the town council. Our people are determined that none but the best influences shall surround their families and those who may come for the purpose of securing an education.
Parents who desire to place their children under good educational advantages, where they shall be free from the intemperance and immorality prevalent in the larger towns, will find in Monmouth just what they desire in these respects. It is a school town, built up for this purpose, and all other interests center in this one. Hence, its superiority for educational purposes.

ADVANTAGES.

Persons desiring to educate themselves or their children, naturally look for a school with such facilities as will enable it to give a good, thorough, practical education, in the least time compatible with thoroughness, and at the same time inspire the young with a love for the good, a desire to do something and be something in the world, and that with the education of the mind and heart, shall give that energy and enthusiasm without which education is of little worth to its possessor and of no value to others. Please take a view of Christian College from this standpoint.

THE FACULTY.

The most important element to the successful working of any institution of learning. Huge piles of masonry and immense endowments are of little consequence unless the professorships are filled by men of ability, moral worth, energy, and who know how to teach. Experience abundantly proves that the best teaching and most successful management comes from men who have not passed the meridian of life. Successful teaching

requires that energy and vitality that active men possess in their younger years, but which fade as the evening of life draws on. The great achievements in discovery and invention, as well as teaching, are being accomplished by comparatively young men. Keeping these facts in view, the Board of Trustees have sought to put in the various chairs of Christian College, men of marked ability, of established success in their respective departments, and who are just in the maturity of life. They have not waited for applicants for the positions to be filled, but by the eye of careful scrutiny have looked over the field and invited the best talent that was to be found. At the hand of these men they expect to see Christian College among the most honored institutions of the land.

BUILDINGS.

Only one wing of the new brick College building has been completed, and this is being remodeled and greatly improved this year. It contains three working stories of large, airy and well lighted rooms, used for study and recitation. The old College building adjoining has been thoroughly overhauled and, is 40 by 60 feet in size with octagonal ceiling 22½ feet high and is probably the most convenient and attractive College chapel in the State. These buildings are situated on an eminence in the midst of a beautiful artificial grove of maple and fir. The view from the College premises is an entrancing one. The buildings as now arranged furnish facilities for the most successful work.

APPARATUS

Sufficient for ordinary purposes of illustration, is now provided, and considerable additions will be made this year. We expect to have in a few months everything necessary for illustrating the Physical and Mathematical Sciences.

THE LIBRARY

Contains a few volumes of interest, which will be rearranged and catalogued, and new volumes of value be added as fast as the means at our command will allow.
DISTINCTIVE FEATURES.

Persons looking for a location for the advantages of a Collegiate education, will naturally and properly inquire into the distinctive features of each of the Colleges claiming their attention and asking their patronage. The features of Christian College to which we especially invite attention, as distinctive of our work are as follows:

CHRISTIAN MORALITY.

The Bible is read every day and lectures calculated to impress its morality are given, and with the Bible as a basis, the effort is to impress the highest Christian morality as the guiding principle in the lives of our students. Dogmatism and Sectarianism are carefully avoided, and no person of whatever religious tenet will be able to take exception to the general Christian principles taught in these lectures. We ignore all religious or political divisions, and encourage great freedom of thought, and aim to stand on that high plane where Protestant or Catholic, Democrat or Republican, can meet on one common level, and all be guided alike by the unapproached and unimpeachable morality of the Bible.

PRACTICAL EDUCATION.

The great demand of the times is for men of action. An institution of learning to meet the needs of the people, should not only impart instruction, but along with the knowledge gained, give the power to use it to advantage for themselves and others. We cut loose from those antiquated ideas so prevalent in Colleges, that to give mental culture is the only work of a College, and that to this end five or six years must be spent mainly on the Greek and Latin languages.

The idea of Christian College is, that as fine mental culture and immensely more benefit may be obtained by the study of those things that will fit young men and women to enter some pursuit or business, and carry it forward successfully. Instead of making the Ancient Languages the central thought in our work, we make them an auxiliary simply to a better understanding of the English language, which is the greatest language on earth.

Christian College for her future policy adopts those great principles that for the past decade have made the University of Michigan and Harvard University so very successful and popular. Instead of those branches that are simply ornamental, we prefer those that are useful, and we invite comparison and criticism on our work.

Our aim is to graduate young men and women for business pursuits, for any of the fields of oratory, for literary work, for teaching, or any of the pursuits of life, except the special preparation for law or medicine, and the basis for the successful attainment of both of these is well established.

DEPARTMENTS.

MATHEMATICS.

The Course of Study in this department is very full. The various branches are taught from a practical standpoint, with a view to the application of each principle to such affairs as people meet with in life and desire to understand. Trigonometry, Surveying and Astronomy are illustrated by the use of the necessary field instruments and apparatus.

ENGLISH LANGUAGE AND LITERATURE.

A ready command of our own tongue, with an accurate knowledge of its history and authors, is one of the most important acquisitions. No other accomplishment can supply the want of this. It can only be acquired by a thorough study of
English. The idea that it is best acquired by studying the
Ancient languages is a fallacy that is condemned by the unbi-
based mind. Yet it is a cherished principle with those Colleges
built after the antiquated pattern as little in accord with the
needs of Americans. In Christian College the course in En-
glish extends through the entire course and we consider this
one of our most valuable features.

SCIENTES.

The rapid advance made in the various departments of
Science and the rapid succession of discoveries of new prin-
ciples and applications, constitute one of the wonders of the age.
No man can claim to be educated who is not conversant with
the present advanced stage of Science. Very thorough work is
made of all these, assisted by the use of the apparatus at our
command. Sufficient time is allowed for a comprehensive un-
derstanding of the great principles of each science. Through
these as Nature's laws, we look up to Nature's God and adore
Him who "upholdeth all things by the word of his power."

ANCIENT LANGUAGES.

By pursuing the best methods, the progress in acquiring a
knowledge of the Greek and Latin languages, is rapid, but as
it is much better to read a few books well and be master of
them, than to skim over a great many, we have dropped several
authors that are frequently read in Colleges, with a view to
doing better work in those that are read, and to give more time
for the pursuit of the course in English and the Sciences. Ex-
perience has demonstrated that better linguists and scientists
result from this course.

BIBLICAL LITERATURE AND EXEGESIS.

This department will be organized in Christian College for
the first time with the opening of the coming session. The
object will be to study the Sacred Scriptures analytically and
critically, with contemporaneous profane history, and evidences
of Christianity. Methods of sermonizing, pulpit oratory,
methods in revival meetings and the care of churches, will all
be carefully investigated. As this department is not yet or-
ganized, we are unable to present the course of study.

It is this department that the Christian brotherhood, as a
body, are particularly interested in. The interest of the church
is carefully considered in this, while all other departments are
wholly free from any religious discussions, except the uniform-
ly recognized principles of Christian morality.

DEPARTMENTS OF ARTS, &c.

In this department are grouped a number of those branches
that are generally wholly neglected in Colleges, but which are
among the most important of all, being the key to the proper
use of all the others, and the foundation of success in life. The
importance of these, and the superior merit of Christian College
in giving such prominence to them, will, we believe, be appreci-
ciated by all thoughtful people.

Elocution.—Great prominence is given this subject, both
in theory and practice, not only on account of its great impor-
tance, but also because of its general neglect. To give our
students an easy, graceful and natural delivery, that shall
enable them to appear creditably on the rostrum, in the pulpit,
or in the school room, is our object; recognizing the great prin-
ciple, that it is not what a man knows, but what he can impress
upon others that will make him useful in the world.

Penmanship.—A rapid and beautiful style of writing is one
of the most worthy accomplishments. An analytic course of
training after the best systems secures the most desirable re-
sults, and fits students either for business correspondence, or
teaching the subject successfully.

Vocal Music.—As Americans we have been slow to appre-
ciate the value of music as a part of our educational course.
While one of the most delightful studies, it is of the greatest
value as a proper recreation from study and of great utility in
after life. A careful training of the voice and a perfect under-
standing of the science, is our aim. Vocal Music, Penmanship
and Elocution are free to all students in Christian College.

INSTRUMENTAL MUSIC, DRAWING, PAINTING, &c.—These
branches are taught by private teachers at the prices named.
The teachers for some of these have not yet been secured, but
will be just as soon as arrangements can be made with such as are of acknowledged ability.

COMMERCIAL DEPARTMENT.

Every facility is here afforded for fitting young persons to successfully carry on any kind of business. The best authors are studied on the various subjects, and such practical tests are made as will insure thoroughness on the part of the student.

Diplomas.—Students completing the course of study in this Department, will receive Diplomas with appropriate degrees.

The great demand of the times is a thorough, practical Business Education, as the surest and most economical means of acquiring wealth, and of preserving it when acquired.

Sufficient time is very essential in which to learn principles and fix habits. A full Commercial education cannot be well acquired in less time than is here given. The expenses of the whole year in Christian College, are less than for the ten or fifteen weeks spent at most Commercial Colleges in the cities, and the advantages are incomparably greater.

Book-keeping is taught by Single and Double Entry, in all its departments of Trade, or Commerce, including Individual Transactions, Partnerships, Merchandise Companies, Jobbing, Rail-Road, Steamboating, Commission and Forwarding, Agencies, with a very thorough course in Banking, and Brokerage and Exchange. The Bryant & Statton system of Bookkeeping is followed.

Penmanship.—A rapid and legible hand-writing is an indispensable requisite to the business man. Great prominence is given to this branch in the Commercial course.

Commercial Law.—The Compendium of Commercial Law, by Calvin Townsend, is used as a text-book with great satisfaction and marked success. Lectures and examinations are made auxiliaries.

Business Calculations.—Every man should be his own "Ready Reckoner." Two terms are spent in learning the best and shortest methods of calculating and other things connected with the subject.

BUSINESS FORMS AND CORRESPONDENCE.—Such a training in these is given as will enable students to enter at once into actual business.

Tuition is free to College students. The studies of the Commercial course are included in the regular College course, and will be taken by students in the regular course.

GRAMMATION.

Mathematics is made the standard of graduation. Students are classified and pay tuition accordingly.

Collegiate.—The course in the Collegiate grade begins with Equations in Algebra.

Preparatory.—Includes Arithmetic and Algebra to Equations, with concurrent branches.

Intermediate and Primary.—To meet the wants of many families who come here for educational purposes, these grades have been established and will be supplied always with the very best teachers and apparatus, such as will secure the best results and give the highest satisfaction. Parents who wish to do better for their smaller children than they can in the country schools, should send them here.

DEGREES.

Appropriate degrees attested by diplomas are conferred upon such as complete the prescribed courses of study.

The Classical Course includes all the branches as given in the course of study. The degree of A. B. is conferred in this course.

The Scientific Course includes all the studies of the Classical, except the Greek and Latin languages, and includes one year in Latin. The degree is B. S.
On the completion of the Commercial course, the degree B. A. (Bachelor of Accounts), is conferred.

The graduating fee in the Scientific and Commercial Courses, is $5.00, in the Classical, $3.00.

MISCELLANEOUS.

ADMISSION.—Persons desiring to be admitted as students of Christian College, must present satisfactory evidence of good moral character.

DISCIPLINE.—The principles of and motives to self government are faithfully presented, which with the perfect system in all the workings of the institution, insure the most orderly conduct. No iron rules are laid down, but students are carefully taught to be ladies and gentlemen, with the eyes of fellow students and teachers upon them. They are graded in deportment on the following principles: Regularity and Promptness in attendance at all exercises of the College, Decorous Conduct at all times, Abstaining from Immorality and Boisterousness and from communicating with each other during school hours.

Reports of the standing in classes and deportment will be sent at the close of each term to such parents or guardians as request it.

TEXT BOOKS.—Students should bring all their old text books. If not used here they will be useful for reference. Other books can be bought as cheaply here as anywhere, and many books can be had for introduction at about half price.
