Seniors Must Look Ahead

You, the Seniors, are the threshold of a new life. Four years of high school are behind you, many years of a life molded by you yourself are ahead. But what will you do in these years? Work? Enter college? Go to work? In order to decide which college our university you'd like to enter, you must first consider if that one or two years, you will experience a kind of freedom from schedules that will make the routine at school seem difficult to comply with.

But suppose one feels that high school is sufficient to get a job, and decided to become a clerk or typist. Would that person be content to hold the same position for years? No! Life is made to want to become better. But, the clerk or typist discovers that he must have a little more learning in order to advance, and that in where college comes in.

It becomes obvious that for one who wishes to enter a profession, become a clerk or typist, or even have a business of his own, more than just high school is necessary. All these fields are now involved in RELATION, leading paths of real value. The choice is YOURS, Seniors. It is your opportunity to act now.
