**PARADISE FOR STUDENTS SEEKING MORE KNOWLEDGE**

Out of the dust and turmoil of a new desert community comes the building of the High School located temporarily in Block 43. The buildings are of the same type now used for general housing facilities. Just as friendly as ever, the teacher greets you, perhaps with a southern accent, new to us...

The laundry room serves as the Chemical Lab., makeshift benches serve as chairs. The students can imagine themselves rolling on the waves of the Salton Sea, but in reality it is the gentle up and down motion of the plank as the students give way to restlessness.

Does hall tables serve as meal desks? After each period there is a mad rush to get a good seat for next period. Necks are crammed every way in order to see what is written on the blackboards which are painted on the walls.

The empty lot at the edge of school has been designated as the athletic field. It's just another empty lot but will take shape under our care.

Handicapped by lack of essentials, lecture courses are stressed. Even under these adverse conditions we partake in the great system of American education.

**LAND TO BE CULTIVATED**

Ten 40-acre land plots are awaiting cultivation and planting by the agriculture students of Mrs. N. George and Mr. Shigeki Matsumoto.

After completing the study of soil analysis, the students will plant and manage the plots and keep records of progress made. A similar course is being followed by the truck gardening classes.
