Over the course of this term, I’ve learned a few different ways to present information in a professional manner. Believe it or not, it’s actually already helped me promote my friends and I in our kayaking endeavors.

Powtoon had to have been one of the more interesting tools we were taught how to use over the term. It was in a sense, childish. I would not use it as a presentation tool in the workforce.

By far, my favorite web tool that we used was Prezi. It was very easy to make, yet looked as though you had spent hours upon hours to create. This is possibly the only presentation tool I’ll use once I go back out to the workforce.

VoiceThread had to have been the most difficult tool to use, by far. Though, it was also the most rewording. It gives the audience a voice and face to go with the presentation. I was able to be enthusiastic when I needed to be, which the listener wouldn’t have known if they had just been reading the slides.

This entire class was an environment of blended learning. Not only were we in the classroom, but we were constantly on the class’s webpage receiving grades and homework assignments.
