# Web Tools in Education

## Prezi

## Google Sites

## SlideShare

Prezi was one of the many web tools I was able to learn about this term. Prezi allows you to choose where you type and put images. It allows you to not only upload and make slides and presentations, but it gives you the option to send and share the link to your personal Prezi's. This web tool makes it easier to share your presentations that you create.

Google Sites allow you to create and edit web pages, and websites. It gives you a chance to send out your URL to your site and share all your ideas and content you would like to share. Google Sites is great for someone who's trying to create a business, or wants to promote something over the internet. Google Sites is a great way to share with a group. Information you were wanting a group to get, you can share it over email.

SlideShare is a web tool that allows you to put slides together and send and share them. They also give the audience and or the people who watch your presentation to comment, and share what they think. SlideShare also gives you many options at the top as you can see on the left. It allows you to send via email, or simply save it and embed it.

# VoiceThread

VoiceThread is a web tool that you can create, upload, and record. It gives you the chance to upload images, type text, and record your own voice. The process is Create, go to "My Voice", then upload and start typing and, or recording. It's a great web tool that allows you to share and create presentations quickly and easier.

How College is Different From High School	
FOLLOWING THE RULES IN HIGH SCHOOL	CHOOSING RESPONSIBLY IN COLLEGE
* High school is <i>mandatory</i> and usually <i>free</i> .	* College is <i>voluntary</i> and <i>expensive</i> .
* Your time is structured by others.	* You manage your own time.
* You need permission to participate in extracurricular activities	* You must decide whether to participate in co-curricular activities.
* You can count on parents and teachers to remind you of your responsibilities and to guide you in setting priorities.	* You must balance your responsibilities and set priorities. You will face moral and ethical decisions you have never faced before.
* Each day you proceed from one class directly to another, spending 6 hours each day--30 hours a week--in class.	* You often have hours between classes; class times vary throughout the day and evening and you spend only 12 to 16 hours each week in class
* Most of your classes are arranged for you.	* You arrange your own schedule in consultation with your advisor. Schedules tend to look lighter than they really are.
* You are not responsible for knowing what it takes to graduate.	* Graduation requirements are complex, and differ from year to year. You are expected to know those that apply to you.
* Guiding principle: You will usually be told what to do and corrected if your behavior is out of line.	* Guiding principle: You are expected to take responsibility for what you do and don't do, as well as for the consequences of your decisions.

# Blended Learning

Blended learning is education that inter-mixes face-to-face classroom learning and methods with computer and web based learning. It's when teachers and professors combine different types of learning to their students. It's changed to excess over the years.
